

Napkin AI tutorial – Short format AI education

My AI Cloned Voice with Napkin AI Tutorial

<https://youtube.com/shorts/OK9y2c2IRsU?feature=share>

Context

Part of an ongoing AI tutorial series for social media, created to help the HIKE community understand specific GenAI tools in a simple, visual way. This piece explains how to use Napkin AI, with my own AI-generated voice.

:contentReference[oaicite:2]{index=2}

Goal

- Make one specific tool understandable in under 2 minutes.
- Test a tutorial format that can be repeated for other tools.

My role

- Script and structure of the tutorial.
- Screen recording and on-screen annotations.
- Voiceover using an AI voice clone and final editing.

AI tools & workflow

- LLMs for tightening the script and call-to-action.
- ElevenLabs (or similar) for AI voice.
- Editing in (CapCut / Canva)

Process

1. Wrote a short script focused on “problem → solution → demo → CTA”.

2. Recorded the workflow in Napkin AI.
3. Generated voiceover from the script, synced with the recording.
4. Added captions and simple motion to highlight key steps.

Outcome

- Shared as part of HIKE's AI tutorial series on social media.
- Reused structure for future tool explainers.

Samples

- [Link to the tutorial video]
- 1–2 screenshots of key moments.
