

Avishek Chatterjee

"I design stories, campaigns and experiments with Generative AI."

Hi, I'm Avishek

I work as an Independent Creator in the spaces where design, code, sound and storytelling overlap, and in the last years AI has become a big part of that practice for me. I use AI as a creative partner. It helps me write, sketch visuals, shape music and sound, and build small experimental tools and applications.

My vision is to keep exploring how different AI systems can be used in a thoughtful way for art and creative workflows, and to share what I learn with others who are curious about making films, music or interactive art pieces with these new tools.

What I do

- AI Films & Visual Storytelling
- AI-Powered Campaigns & Content
- AI Workshops & Bootcamps
- Prompt Engineering
- Digital Marketing and Entrepreneurship Coaching

Featured Projects

 Name	 Link	 Overview text
 <u>CTRL+ALT+D EITY.exe An AI Short Film</u>	<u>https://artefact-ai-film-festival.com/gallery/ctrl-alt-deity-exe-69307062ca68f</u>	An AI-produced sci-fi short film from script to sound design, selected for the Artefact AI Film Festival.
 <u>GenAI Sessions</u>		I conducted 3 sessions on GenAI topics: NotebookLM, Vibe Coding and AI Music Production
 <u>AI Experiments</u>		Narrative design, VFX Transition exploration, concept development, visual aesthetics
 <u>Nano Banana x HIKE: Holiday Prompt Drop Series</u>		Advent Calendar style December series for Christmas : every day a new theme, prompt and AI-generated image to make prompt engineering tangible.
 <u>AI Tool of the Month Exploration Series</u>	<u>https://youtube.com/shorts/OK9y2c2IRsU?feature=share</u>	Ongoing format at HIKE exploring individual AI tools through real use cases from marketing, content production and startup workflows, presented as internal documentation, social posts and live demos.
 <u>Marketing Campaigns Storytelling</u>		Storytelling video and content for a campaign that supported continued public funding for HIKE.

A Complete Overview of all my Projects
